

Calibration Manifolds

Hand-Held Compressed
Gas Controller

Precise Pressure Control

Perform static pressure calibration right at your device under test with this unique hand-held pressure controller that you can take with you anywhere.

Differential Transmitter Pressure Calibration

Quickly reach the test points required to perform static calibrations with less effort and more accuracy.

Pint-Sized Simplicity

Hook up a compressed gas cylinder at one end, a device to be calibrated on the other, and a gauge in the middle. It's that simple.

No Reason to Rig

Replace clunky DIY setups with this straightforward, intuitive tool for testing analog gauges on well heads and other applications where compressed gas is required.

Compact, Intuitive Design

Save time and nitrogen with this deceptively simple tool that gives you smooth, ultra-precise control over a compressed gas source.

Additional accessories also available

Bundle with a reference gauge or pressure reference for a complete solution.

All ports and included hoses feature the **Ralston Quick-test™ System** of fittings, hoses, and adapters that help you create secure, leak-free connections without the need for tools or tape. Visit our website to learn more about the **Ralston Quick-Test™ System**.

Calibration Manifold Specifications

	QTCM Calibration Manifold	QSCM Calibration Manifold
Materials	Anodized Aluminum, Brass	Anodized Aluminum, Stainless Steel
Max Pressure	3,000 psi / 200 bar / 20 MPa	5,000 psi / 350 bar / 35 MPa
Inlet Port	Male Quick-test	Male Quick-test
Outlet Port	Male Quick-test	Male Quick-test
Fine Adjust Resolution	0.1 psi / 690 Pa	0.1 psi / 690 Pa

Configure a kit or find out more about Ralston Calibration Manifolds:

Ralston Instruments provides complete pressure calibration solutions for a wide range of applications, saving time and taking the guesswork out of critical pressure testing, maintenance and repair operations.
