

## Pressure Regulators

Piston sensed pressure reducing regulator for use in providing a stable pressure to precision pressure control devices.

### Features

- Outlet pressures up to 3000 psi (210 bar)
- Great for test stands and test benches
- Lighter than most other regulators on the market
- Can be panel mounted
- Smooth pressure adjustment with bronze bearing
- An excellent accessory for Ralston Instruments volume controllers, Nitropaks and calibration manifolds
- Made in USA

Pressure Regulators
