

## Quick-test XT Hoses

10,000 psi (689 bar) working pressure Microbore hoses that provide a very quick, low volume, high pressure way of connecting to any pressure instrumentation, hand pump, calibration source or device under test

### Features

- Low volume reduces the pumping effort or compressed gas usage in pressure calibration
- No thread sealant required ? connect to adapters without wrenches, thread sealant or thread tape
- Bubble tight connections to 10000 psi (689 bar) with no moving parts reduces maintenance to almost zero
- Hose is hard to break and very flexible
- Adapt from hose to virtually any device under test with only one connection
- A corrosion resistant strain-relief on each hose end reduces wear and dramatically increases hose life
- Hose is not recommended for Helium or Argon applications
- Hose is pin-pricked for use in Natural Gas applications
- Quick-test XT hoses are NOT compatible with QTHA adapters. Please use XTHA adapters
- Made in USA

Quick-test XT Hoses
